

Day 1: Tuesday, October 22, 2023

Today our teacher gave us our duotangs/ logbooks to put our names on it and put some important forms and papers inside. She also showed us a presentation on D2L about it and how it works.

After, we went in the hallway, and walked around and chose the major topic that we wanted out of 15 major topics. Me and Arianna chose Zoology as our major topic. Zoology started calling to us because me and Arianna both love animals and care about them. I had already gone to a Wolf Sanctuary so I wanted to share my learning knowledge with my partner and everyone else around the world!

Day 2: Thursday, November 2, 2023

Today, Mrs. Pond told us to fill out our basic information form online on the CYSF link she sent us. We had to find and pair with our partners on the site to be able to move on to fill the form. It took a long time to find the right partner but we did it.

Day 3: Friday, Nov 3, 2023

Today, me and Arianna started looking at different websites to find info for our project "Wolves and how they help maintain ecological balance". We put the websites on our bibliography on a google docs.

Day 4: Friday November 17, 2023

We researched on what zoology is, means, and how it's found out. We also researched our thesis, scientific principals and some facts to put on our trifold. We also found out that the link to the Science fair application wasn't working. So it was very stressful and chaotic for both Ms. Pond and us.

Day 5: Wednesday, 29 November, 2023

Today we wrote ^{more} about wolves and how they help maintain ecological balance.

Day 6: 4 December, Monday, 2023

Today, we filled out our Ethnic Due forms which took up most of today's class time!

Day 7: Tuesday, December 5, 2023

Today, we kept working hard on our project.

Day 8: Thursday, January 11, 2024

We realized that we didn't finish the Ethnic's Due form 2A so we finished that and continued on our research. Tomorrow, we start our trifolds.

Day 9: Tuesday, January 16, 2024

We got our trifold today and Ms. B/ Benzett put our names on it. We stuck our title on our trifold after layering it. We chose the colors yellow, white and gray. Oh and also, our trifold is Black.

Day 10: Wednesday, Jan 17, 2024

Our basic info form got a green checkmark and Ms. Pond said that means the CYSF staff have approved of our form and should read it.

Day 11: Tuesday, 23 Jan, 2024
Kept working hard on google docs. research.

Day 12: Thursday, 25 January, 2024

We started putting up some info on our trifold and I took it home to work on it.

Day 13: Friday, 26 January, 2024

Me and Arianna started tweaking our information because we realized that some parts didn't make any sense.

Day 14: Monday, January 29, 2024

We were kind of running out of space on the trifold and realized that we didn't print the Scientific principals info! Before we added the last thing we quickly printed our Scientific principals info and starting layering our things.

Day 15: Wednesday, January 31, 2024

Today, I put up color changing light on our trifold at home. Before, I also burned myself trying to hot-glue our papers.

Day 16: Thursday, February 1st, 2024

Today, we realized that the hot-glue didn't work so we used tape. I

think it was a good and bad idea. Bad: it doesn't look good. Good: it works/worked.

Day 17: Friday, Feb 2nd, 2024

Today, I worked on the log book.

Day 18: Sunday, Feb 4, 2024

Today, I made speaking notes/script for our presentation/project.

Day 19: Monday, Feb 5, 2024

I talked and explained Arianna about the script. I also worked on looking for videos of wolf sounds and Stuffy's so our trifold station would look more appealing

Day 20: Wednesday, Feb 7, 2024

Today, I worked on the logbook
and worrying about tomorrow.

Day 21: Thursday, Feb 8, 2024

Presentation / BIG Day!!!!!!!!!!!!!!!!!!!!
