

Ex: November 21, 12:42 - 1:00 - Brainstormed ideas

Thursday november 23 2023

Today we got the hornworms there are 4 named lil bugger, munchie, furn, and indi. we are not shure how old they ary and when teye are going to pupate. These caterpillrss are just here for us to know how to rise them. Next batch we will start experimenting.

Monday november 27

Today I am going to edmoton and I have to leave the caterpillars home so im making a experiment. What will happen if you leave your caterpillars home for a day (without cleaning their tank) with only tomatoes (not caterpillar food.) well... tomatoes make caterpillars runny so when I got home boy what a mess I had to clean. There was poo every where :)

Wensday November 29 2023

It hase been three days since i last vlogt and wow have the caterpillars gottin bigger infact one is ready to pupate! that means they are rady to make their crisalyses theas caterpillars turn into sphinx moths and have to burro to pupate you might be thinking "but how do thay burrow inside?" Well we reaserchd about

it and the website saidv all you have to do is rip up some paper and put it half way in a smll ish jar then put in the caterpillar (trust me it felt very wrong) then put some more paper on top.

Hornworms need compleat darknes

Dec 27 2023

Today me and maya foud out how to tell the diferince between mail and femail caterpillars. On mail caterpillars they have two bumps on segment nine the second last segment but of femails there ninth segment is smoooth and they have a small groove on segment eght. Also how to tell if it is a tamao hornworm or a tabaco hornworm. Tomato hornworms have black horn thogh tabaco hornworms have red horns.

Dec 29 2023

Today I found out that hornworms most ulually eat tomatoes (witch i knew already) but also uncomeny eat eggplant, pepper, and potato plants form nightshade family. This will be useful for later.

I also foud this image wich is completely different from what google said  
We usually feed the caterpillars this hornworm food and tomatoes.

Jan 13 2024

Today I got 4 new hornworms named packman, jade, tiny, and big bugger

We separated pacman from the others because he will only be eating tomatoes

Meanwhile the others eat hornworm paste.

Jan 24 2024

It has been a week since I last blogged and The tomato hornworm grow way bigger then the paste hornworms.

Feb 2 @024

Today I put did in the horworm inclosure because guss wat! Our hornwaorms are ready to burrow and make there chrysalis in two weeks time thre chrysalis will be compleat and then one week later weel have ``````moths.

Feb 9

Suprisingly this last week the horworm paste hornworm burrowed and the tomato hornworm stll hasendt burrowed..Ex:

Dec 27 2023

Today me and maya foud out how to tell the

diferince between mail and femail caterpillars.  
On mail caterpillars they have two bumps on  
segment nine the second last segment but of  
females there ninth segment is smooth and  
they have a small groove on segment eght.  
Also how to tell if it is a tamao hornworm or a  
tabaco hornworm. Tomato hornworms have  
black horn thogh tabaco hornworms have red  
horns.
