

Arshnoor Sidhu, Bacteria and Disinfectants project:

Feb 3-10, 2024:

- Planned and brainstormed project ideas

Feb 10-15, 2024:

- Finalized project idea.
- Began forming the experimental design with feedback from Nairn Mclean.
- Worked on the basic project information, hypothesis, variables, and procedure.

Feb 15-20, 2024:

- Conducted background research, and learned about bacterial culture and homemade incubators.
- Started researching materials I would need.

Feb 20-25, 2024:

- Started ordering and collecting supplies.

March 1-3, 2024:

- Gathered all the ordered supplies.
- Began the experiment (following the procedure).

March 3-8, 2024

- The experiment continued, the bacteria began growing
- I observed bacterial growth everyday.

March 8-15, 2024:

- Completed the post-experiment work, including observations, analysis, conclusion application, etc.
- Completed the final project.
