

January 25, 2021 - Entry #1

Today, I have started working on my research part for the project. I have found that GMO seeds are more expensive than regular seeds. I was surprised to find out that regular seeds are around 150 dollars less than GMO seeds.

January 27, 2021 - Entry #2

I completed my research part of the project. It was interesting to understand different people's opinions and learn more about facts, which I did not know before. I would say this online fair is great! I hope I do a good job and win, though the experience is what counts.

February 10, 2021 - Entry #3

I researched more on GMO foods to make sure the facts I had were correct and not only fake. I also listed down the websites I used, in a notebook, so that I do not forget them. For many of the facts I had to make sure from different sources, so it took time. My project is a research project and not an experimental one, because I am trying something different than I have done before. I usually do experiments, so I decided to step out of my comfort zone.

February 22, 2021 - Entry #4

Today I got an email to set up a platform on the cysf website, where I could submit my entire presentation! I am very excited and have already started putting information into the platform. Today, I completed the problem part of my project.

February 29, 2021 - Entry #5

I am halfway through my project and will try to complete it within the next week or so. I will try my best to complete, though I am not sure about how much time it may take, so I have to work.

March 10, 2021 - Entry #6

I have completed $\frac{3}{4}$ of my project, I am so close to completing, I am extremely excited. I hope the judges like my project. Anyways, I have learned a lot through this science fair. First, the research has taught me about the world and how people still do not have enough food to survive. Also, about how to work through online platforms.

March 18, 2021 - Entry #7

I am completely done with my project, and am about to submit it. I have checked with Ms. Watson and she approves! So, I hope the judges like it. I worked hard on this research project and believe it is one of the best science fair things I have done.
