

Name	Talha Amin
Grade	8T
Project Title	Which surface in my house has the most bacteria?

Date	Information / Data / Accomplishments
Wednesday, November 29, 2023	On this date, I decided on my CYSF project titled: Which surface in my house has the most bacteria.
Tuesday, December 5, 2023	Today, I filled out the CYSF basic project information.
Tuesday, December 5, 2023	Today, I read this article https://karmacarpetcleaning.com/beware-your-rugs-are-filled-with-bacteria-and-other-contaminants/ that is about how easy bacteria can grow and stay in your carpets. This information can help me with my hypothesis.
Thursday, December 7, 2023	Today, I filled out the Ethics Care Due 2a on the CYSF platform.
Sunday, December 24, 2023	Today, I read this article: https://glassed.vitroglazings.com/topics/glass-decontamination that is about bacteria on glass.
Sunday, December 24, 2023	Today, I read this article: https://greyspaceflooring.co.uk/blog/are-wood-floors-hygienic/ that is about bacteria on wooden floor.
Saturday, December 30, 2023	Today I found my hypotheses and it is how the carpet will have the most bacteria.
Wednesday, January 10, 2024	Today I started my experiment by get all the bacteria from the surfaces and putting it somewhere the bacteria can grow.
Thursday, January 11, 2024	Today I took pictures and because the bacteria was not finished growing I can't make full observations but I do see some bacteria growth.
Saturday, January 13, 2024	Today the experiment had finished and I wrote my observations.
Saturday, January 13, 2024	Today I wrote my observations and stated a conclusion.
Monday, January 29, 2024	Today I put all my information on a slide so it could be more presentable and also put all that information on the CYSF platform.
Wednesday, February 7, 2024	Today I printed out my title and slide's.
Wednesday, February 7, 2024	Today I glued everything on my Trifold.
